

HTTP

text based

client server protocol

1. Clients initiate

The client (e.g., browser)

first message – a request

The server never starts

responds.

This asymmetry = client

stateless

two types of messages

1. request optional

2. response optional

what are 100 200 300?

whats the header and the body?

always a body? no why?

the body is optional (file data)

```
base) devak@devaks-MacBook-P
```

```
(base) devak@devaks-MacBook-l
```

```
